TERMS

All bills are subject to 2 per cent discount within 10 days from invoice date. Sixty days net. Sight draft, plus interest, thereafter.

Shipments are forwarded by best carrier, in our judgment, at time of delivery, unless otherwise specified by customer.

First-class stock is carefully packed when shipment is made, and we hold good order receipt from the transportation company. Our responsibility ceases thereafter. If the stock reaches you in bad condition, notify agent and bring claim against the delivery company for damage by their negligence, as no allowance for this cause can or will be made by us.

All items in this list are offered subject to crop deliveries or failures, and being unsold on receipt of order, and other conditions beyond our control, and ALL PRICES ARE SUBJECT TO CHANGE WITHOUT NOTICE.

Bulbs, whether shipped on arrival or placed in cold storage for later delivery, may be examined at time of arrival if

desired, but no claims will be entertained at a later date. As to all items other than **bulbs**, claims must be made within five days after receipt or they cannot be recognized.

In the interest of time saving, we ask that you authorize us, when necessary, to substitute with the nearest similar size or variety.

Discounts for cash with order.

Bulbs, plants, supplies, 3%.

Flower seeds, 5%. (8% on orders \$25.00 or over). Cyclamen. Grass and Vegetable seeds, and Fertilizers, Net. No C.O.D.'s.

New accounts desiring credit, please give three trade references.

Flower seeds are shipped Parcel Post prepaid.

All other items are not prepaid. Please include sufficient postage with cash orders. Postage will be billed on Charge Orders.

Disclaimer. While we, S. S. Skidelsky & Co., Inc., exercise the greatest care to have all seeds pure and reliable, and all bulbs, plants and cuttings true to name, we do not give any warranty, express or implied, and will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they must be returned at once and the money will be refunded. Our liability in all instances, are limited to the purchase price of the seeds, bulbs, roots or plants.

LINDIG SOIL SHREDDERS

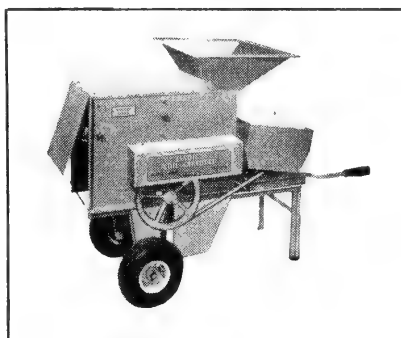

"The Growers Friend"

Not even the smallest florist, nurseryman, or landscaper can afford to be without the new improved Lindig Model B Soil Shredder.

These new Model B Soil Shredders come in various sizes to fit every soil shredding need, large or small.

The new Model B with the ACTIONIZED shredding blades is the product of several years' actual testing in the field and is the finest shredder to be found on the market today.

The Model B is designed for the speedy, thorough, perfect shredding of soil, peat, manure, compost piles, leaf mold, sphagnum moss, shingle tow and sods; also for mixing soil with manure, commercial fertilizer, etc. The Model B will shred five to six times as much soil as could be screened by hand in a given time. All the valuable manure and other humus are retained, assuring you better soil conditions at all times. Stronger plant growth and greater profits are yours with powered shredding.

Protexall—The original four way insecticide and fungicide.

Protexall Contains:

DDT for the control of chewing insects such as cabbage worm, leaf roller and many juice drinkers such as leaf hopper, flea beetle and European corn borer. It destroys with amazing effectiveness Japanese beetles and some plant aphids.

Rotenone for the control of aphids, bean beetles and most other insects against which DDT is ineffective.

Fermate a fungicide harmless to most delicate plants, still giving complete protection from many pests which resist other materials. For black spot on roses, leaf spot on roses, leaf spot of chrysanthemums.

Sulphur a very effective fungicide familiar to all experienced flower growers. Sulphur, combined with Fermate, will give protection from most forms of fungi and bacteria.

Protexall is prepared in two forms; one to be used as a liquid spray and one as a dusting powder. The spray is a powder which mixes very easily in water. Protexall dust comes mixed and ready for instant use.

It is necessary to order the form you prefer and for which you have equipment, since the spray material does not make an efficient dust, and the dust is prepared with an inert filler and cannot be used as a spray.

GREENHOUSE WHITE PAINT

Non-yellowing, fumeproof, mildew-proof.
Unusually high one coat hiding.
High gloss finish of unusual durability.

This products is an ideal coating for wood, metal or masonry. It is easy brushing, fast setting and self cleaning. However, it will not wash off severely to stain other surfaces. Due to its Titanium dioxide base, it is much whiter than ordinary house paints and is non-yellowing. It is suitable for both residential and industrial painting. Since it is fume-resistant and mildew proof, this product will give excellent service in industrial and marine applications and will also be more durable for residential applications in areas affected by industrial smoke and fumes.

BIRD Vita-Bands

VITA-BAND 10 For short growing periods. Will usually contain root growth up to approximately 8 to 10 weeks nutrient treated with quickly available plant food. Your judgment determines need for additional feeding.

VITA-BAND D contains root growth until grower chooses to let root through band. Only quick, slight pressure is needed to crack band. Do not remove Vita-Band "D" when transplanting. Band disintegrates in the soil permitting free growth of roots from time of transplant. Nutrient-treated with quickly available plant food.

VITA-BAND H The new successor to Vita-Band "40" will absolutely control the root growth of those plants which demand extra-long growing periods. Vita-Band "H" is constructed with a hard outer coating, which makes it impossible for root growth to break through before transplanting.

BIRD PERENNIAL POTS

These pots are made of much tougher material than other heavy pots. The hard, smooth coating inside and out adds to the toughness and eliminates any possibility of sticking. Bird pots slip apart so easily that a child can unpack them. The solid stapled bottom with openings for drainage allows growers to pickup two or three pots in each hand, by the edges, after potting without losing soil through the bottom of the pot.
